

Online HVAC Service Technician Training

Our HVAC/R Service Tech program is a 2-year training designed to prepare beginners and experienced technicians with the hands-on skills needed to service and maintain residential and commercial HVAC/R systems.

How Our Training Works

Using ACTA's Online Campus, every student interacts "live" with their instructor, watch "how to" videos and use virtual reality simulations to practice what they've learned each week. Even students with little computer experience find it easy to engage in class and learn what they need to know. In addition to our online training, each school year includes 4–6 in person hands-on labs.

HVAC Career Opportunities

- A/C Tech
- HVAC Mechanic
- HVAC Specialist
- HVAC Technician
- Refrigeration Mechanic
- Refrigeration Technician
- Service Technician

Our Trade School

No wasteful classes

- Skip the filler classes—learn only what you need for the job you actually want.

Affordable pricing

- Get real skills without real debt—trade school costs less and pays off faster.

2 years vs. 4 years

- Graduate in 2 years, start earning sooner, and get ahead while others are still in class.

How to Register

Please visit our website at <https://actrade.ac/register.html> to complete the online registration form.

BPPE Approved to Operate

We are approved to operate by the California Bureau for Private Postsecondary Education. Approval indicates compliance with California state standards.
